Solar Real Estate Lighting

As a real estate agent, you work with home owners, sellers, and buyers each and everyday. It is also likely that you hear many of your clients talk about what they can do to increase the value of their home, or save money on their monthly heating and electrical bills. Silicon Solar wants to offer you a great opportunity to help your contacts out with these two challenges, and make some money for yourself at the same time.

Silicon Solar, manufacturer of the world-famous SunPal Solar Real Estate Lighting Series, is also the manufacturer of the SunMaxx Solar Water and Home Heating Systems. These systems can be used to heat domestic hot water, provide radiant floor and baseboard heating, and can even be used in commercial, industrial and municipal applications. And now, Silicon Solar is giving you the chance to make extra income by referring your existing clients and contacts to us, while making yourself a commission on each and every SunMaxx Solar Hot Water Product that they purchase.

SunMaxx 20 & 25 *Evacuated Tube Solar Collectors*

Evacuated Tube Collectors have a unique design and a 360 degree collection area, allowing for much higher efficiencies in colder, northern, overcast climates. These systems can be purchased and installed for under \$5000, and can pay for themselves in as little as 3 to 5 years depending on federal and state incentives.

SunMaxx FP *Flat Plate Solar Collectors*

Flat Plate Collectors are extremely affordable, and when used in warmer, sunny, southern climates where there is little chance of freezing, can be more efficient and cost-effective than Evacuated Tube Solar Collectors.

SunMaxx Accessories *The Balance of your System*

Silicon Solar also carries the accessories and system components that you need to get your SunMaxx Solar Hot Water Heater up and running in no time. Our accessories include storage tanks, heat exchangers, heat dumps, controllers, and pumps.

If you know homeowners that could benefit from these great products, please contact our Solar Hot Water Affiliate Team to get setup with an affiliate referral account today. We will also help provide you with all the materials that you need to start selling these great solar heating systems to every homeowner you meet and know. Our referral affiliates get paid a 5% commission on the products sold through them, and we allow you to offer you clients a 5% discount on SunMaxx Products to ease the sales process.

The 7 Values: Security - Convenience - Peace of Mind - Economy - Save Time - Reliability - Save Money
